

MRS2 STRETCH VINYL FRANGIBLE LABEL SEAL

The MRS2 is a white polyethylene frangible security seal backed with high tack adhesive. The seal incorporates the security petal cuts, which causes the seal to break up on removal, making it almost impossible to re apply in one piece. The seal has an additional security feature that it will stretch and distort on tampering. The MRS2 is also designed not to leave unwanted adhesive residue on the surface of the item being sealed.

GENERAL APPLICATIONS

- Canisters and drums
- Non fibrous/fibrous surfaces
- Wooden crates and boxes
- Search and Seal operations
- Luggage transit seals
- Trailers/Containers
- Doors & hatches
